

# DPF CLEANING MACHINE UAE-06A Fuel Version

## DPF Intelligent Regeneration Equipment

**Uni ALINER**®

An ISO 9001 : 2015 Certified

**Better burning** : Freely set high temperature from 600 to 1000, more energy-saving

**Convenient** : 220V scientific design, compact and easy to move

**Energy saving**: 2-4 liters of fuel consumption per hour, 1 kilowatt of electricity consumption DPF normal processing time is 20 minutes

**Blasting** : Large flow blasting pressure is adjustable, supporting one-click blasting

**Intelligence** : intelligent computer control, fully automatic control system, precise temperature control

**Fast heating** : rapid heating from 0 to 600° in just 3 minutes

**Stable** : nearly 5,000 reliability tests a year

**No cutting required** : matching exhaust pipe and DPF carrier, supporting various types of exhaust pipes and carriers

<input checked="" type="checkbox"/> 220V power supply	<input checked="" type="checkbox"/> Built-in 20L gas tank

Brand : Unialiner	Length:75CM
Model : UAE-06A	Width : 95CM
NW. : 130 kg	Height : 135CM

### Easy to load

DPF/SCR loading is quick and easy

### Precise temperature control

Accurate measurement of flue gas arget assures DPF/SCR regeneration quality

### Fully Automatic

Operations touch screen panel

### SCR DOC DPF high temperature regeneration equipment

For severely clogged DPF/SCR/DOC, through high-temperature oxidation regeneration, the blocked carbon particles in the DPF/SCR/DOC are completely oxidized and purged, which can restore the original efficacy of DPF/SCR/DOC and is environmentally friendly and clean.
